Cost Transfer Policy

It is the policy of the University of Wisconsin – Madison that costs should be charged to the appropriate sponsored project when first incurred. There are circumstances in which it may be necessary to transfer expenditures to a sponsored project subsequent to the initial recording of the charge. Those transactions require monitoring for compliance with UW policy, Federal regulations, sponsor specific guidelines, and the cost principles that underlie fiscal activities on sponsored projects.

When the UW accepts Federal research funding, it must comply with the allowability and allocability requirements of the Federal Cost Principles and the Uniform Administrative Requirements. To comply with the allowability and allocability requirements, it is necessary to explain and justify transfers of charges onto federal and non-federal sponsored projects from other federal or non-federal projects. The cost principles prohibit the use of cost transfers for the purpose of “convenience,” including a transfer largely for the purpose of using unexpended funds on an award that is ending. Timeliness and completeness of transfers and the accompanying justification for the transfers are important factors in supporting allowability, allocability and cost compliance.

In order to maintain consistency in the treatment of cost transfers, the UW’s policy on cost transfers applies to all federal and non-federal sponsored projects. Under the UW’s Cost Transfer Policy, all transfers must be submitted within 90 calendar days of the end of the month in which the expense is posted. When transfers are not adequately justified or are made for inappropriate reasons, the department is responsible for transferring the expenses to a non-sponsored departmental funding source.

Reason for Policy

Proper management of funds is essential to uphold the fiduciary responsibilities of the University. Federal agencies and other sponsors may regard the following activities as indicative of inadequate control systems:

- Frequent cost transfers
- Late cost transfers
- Inadequately documented or explained transfers, especially those which involve sponsored projects with overruns or unexpended balances

Inappropriate transfers will result in expenditures being disallowed and/or subsequent reduction in funding by the sponsoring agency.

Definition of Cost Transfers

A cost transfer is an after-the-fact reallocation of costs, either salary or non-salary costs, to or from a sponsored project within a 90-day period from month end of the accounting date. Funding agency requirements concerning the management of awards made to institutions such as the University of Wisconsin – Madison limit the circumstances under which cost transfers are allowed. In contrast, a rebudgeting action involves the reallocation of budgeted funds and not a transfer of expenditures.

Here are some examples of typical circumstances in which cost transfers are allowed:

- Correction of a clerical error
- Reallocation of expenses where multiple projects benefited
- Reallocation of shared resource costs
- Transfer of pre-award costs from divisional or discretionary project funds to a sponsored project
- Reallocation of a salary expense

A late cost transfer is an after-the-fact reallocation of costs, either salary or non-salary costs, to a sponsored project more than 90 calendar days from month end of the accounting date.

Here are some examples of typical circumstances in which late cost transfers may not be allowed:

- Reallocation of expenses because the grant has unexpended funds
- Reallocation of expenses because the clerical error was not noticed within a 90-calendar day period
Terms and Definitions

These definitions apply to these terms as they are used in this policy.

**Fund 128, 136**  The spending fund identifier that denotes FEE-FOR-SERVICE activity.

**Fund 133**  The spending fund identifier that denotes a NON-FEDERAL sponsor.

**Fund 135**  The spending fund identifier that denotes WARF-sponsored activity.

**Fund 144**  The spending fund identifier that denotes a FEDERAL sponsor.

**Fund 233**  The spending fund identifier that denotes GIFT support.

**Advance Award**  A project that is established in the financial system prior to receipt of an award; a provisional Project ID.

**Accounting Date**  For the purposes of this policy, the accounting date is the month-end date of the journal date as shown in WISDM.

**Allocable**  A cost is allocable to a project if goods or services involved are chargeable or assignable in accordance with the relative benefits received by the projects. In order to be allocable a cost must be treated consistently in like circumstances. For further information see 2 CFR 200, Subpart E or OMB Circular A-21.

**Allowable**  A cost is allowable to a project if:

A. The costs are reasonable;
B. The costs are allocable to the specific project;
C. The costs are treated consistently in like circumstances; and
D. The costs conform to any limitations of the cost principles or the sponsored agreement.

For further information see 2 CFR 200, Subpart E or OMB Circular A-21.

**Appropriate**  If a cost meets the criteria of being allowable, allocable, and reasonable it is appropriate.

**Authorized Signer**  An individual who authorizes a cost transfer transaction, usually the PI or his/her designee.

**Award**  A funding mechanism between the Board of Regents of the University of Wisconsin System and a sponsor whereby the sponsor commits funding to the University for a specific scope of work and for a specific period of time.

**Award Expiration Date**  The end of an award period on a project.

**Cost Transfer**  An after-the-fact reallocation of the cost, either salary or non-salary, to a sponsored project within a 90-day period from month end of the accounting date of a transaction.

**Cost Transfer Review**  A process whereby transactions are analyzed to see if they meet the standards of reasonableness, allowability, and allocability, and are in accordance with Agency and UW guidelines.

**Direct Costs**  Costs that can be specifically and readily identified with a particular project or activity.

**Documentation**  This tab in the Cost Transfer Tool is where the 90-day justification is recorded.

**Effort**  A percentage of time devoted to a project by a principal investigator or other key personnel.

**Facilities and**  Costs that are incurred by the Institution for common or joint objectives and cannot be identified specifically

<tbody>
<tr>
<td>Administrative Cost</td>
<td>with a particular project or program. These costs also are known as “indirect costs” or “overhead”.</td>
</tr>
<tr>
<td>Fiduciary Responsibility</td>
<td>Responsibility to manage funds in a manner consistent with the furtherance of the University’s mission and the conditions specified by external sponsors, when applicable.</td>
</tr>
<tr>
<td>Journal Date</td>
<td>Indicates when a transaction is posted into the general ledger. This date is available in WISDM for each transaction.</td>
</tr>
<tr>
<td>Late Cost Transfer</td>
<td>A transfer requested more than 90 calendar days after month end of the accounting date in which the transaction journal date has posted.</td>
</tr>
<tr>
<td>Non-Salary Costs</td>
<td>For purposes of this policy, non-salary costs are supplies, consultants, travel, equipment, and other non-payroll or non-stipend expenditures.</td>
</tr>
<tr>
<td>PI (Principal Investigator)</td>
<td>The individual responsible for determining that the expenditures are necessary, allowable, allocable, reasonable, properly approved, and adequately documented. A PI may delegate this authority to a designee.</td>
</tr>
<tr>
<td>Project</td>
<td>A set of activities including budget, scope of work, period of performance and PI. An award (the legal obligation of funds) may contain one or more projects.</td>
</tr>
<tr>
<td>Project ID</td>
<td>The numeric/alpha identifier for the financial activity of a project. The Project ID number is a unique seven-digit number/letter combination and is used to record financial activity in the general ledger. It is sometimes referred to as an “account number.”</td>
</tr>
<tr>
<td>Reasonable</td>
<td>Would a prudent person pay this amount for this item or &quot;If it were published on the front page of the Wisconsin State Journal, would that be okay with you&quot;? For further information see 2 CFR 200, Subpart E or OMB Circular A-21.</td>
</tr>
<tr>
<td>Salary Costs</td>
<td>For purposes of this policy, salary costs are payroll expenses (salary and benefits) as well as stipends that are reported as costs to the general ledger.</td>
</tr>
<tr>
<td>Sponsored Project</td>
<td>A project funded by an award from a grant, contract, or cooperative agreement under which the Institution agrees to perform a certain scope of work, according to specified terms and conditions, for a specific budget.</td>
</tr>
<tr>
<td>Stewardship</td>
<td>The careful and responsible management of the Institution’s financial resources.</td>
</tr>
<tr>
<td>Stipend</td>
<td>A payment made to an individual for participation in training or learning experience. The payment helps defray the individual’s living expenses during the period of training. Even though a stipend is not considered compensation for the services of an employee, a transfer of stipend costs uses a salary cost transfer mechanism.</td>
</tr>
<tr>
<td>Transaction</td>
<td>Any event that involves an exchange of funds between two parties. Examples are paying a bill to a vendor, collecting a fee, and processing an interdepartmental charge.</td>
</tr>
<tr>
<td>UDDS or Dept ID</td>
<td>The seven-digit code that identifies UW spending units by University/Division/Department/Subdepartment.</td>
</tr>
<tr>
<td>WISDM</td>
<td>Wisconsin Data Mart for PeopleSoft Financials. The reporting tool used to provide information from the general ledger of the University’s accounting system.</td>
</tr>
<tr>
<td>WISPER</td>
<td>The Wisconsin Proposal Electronic Routing System is a web-based system for electronic routing of applications and agreements related to extramural funding.</td>

</table>
Types of Transfers

Salary Cost transfers

A salary cost transfer means the movement of payroll expenses or stipends onto a sponsored project. Payroll expenses include salary and fringe benefits.

Non-salary cost transfers

A non-salary cost transfer means the movement of expenditures for items other than payroll or stipends onto a sponsored project. Typical examples of non-salary costs include expenses for supplies, services, consultants, travel, and equipment.
Salary Cost Transfers Within 90 Days

An Example of an appropriate Salary Cost Transfer: a payroll error was posted on 9/30. A Salary Cost Transfer needs to be submitted prior to 12/31.

The distribution of salary charges for University personnel should be a reasonable reflection of the employee’s effort. These distributions should be reviewed on a regular basis. If changes are anticipated, a payroll change request should be prepared and submitted.

In the cases where these changes were not anticipated and result in the need to submit a salary cost transfer request, the request should be submitted immediately (see “Timeliness,” below).

Careful consideration must be given to personnel allocations to ensure that projects that benefit are charged properly at the outset and that further adjustments are not required. Salary distribution and the amount of effort as certified in ECRT must coincide. Note: for transfers affecting sponsored Project IDs, if the salary cost transfer request affects a closed effort certification period, refer to the Effort Reporting Guidelines for further guidance.

Permissibility of Salary Cost Transfers

For a Salary Cost transfer to be permissible, it needs to meet the criteria established for both timeliness and appropriateness.

Timeliness

Salary Cost transfers should be processed immediately after the error is identified, but in any case not later than 90 days after the end of the accounting month in which the transaction journal date has posted. Transfers made after this period of time raise questions concerning the propriety of the transfer.

Each Salary Cost transfer must be clearly explained with supporting documentation. The PI or designee has primary responsibility for fulfilling these requirements and maintaining the related records. In addition, the PI or designee is responsible for providing appropriate documentation. Research and Sponsored Programs may also require additional supporting documentation or information beyond what is required with the salary cost transfer request.

Process

To process Salary Cost transfers within 90 days, you will need to submit a completed Salary Cost Transfer in the Cost Transfer Tool to your School/College Dean’s Office. The Dean’s Office will route it to Research and Sponsored Programs for approval. The salary cost transfer should include a complete justification. As general guidance, the explanation should address the following questions:

1. Why was this expense originally charged to the project from which it is now being transferred?
2. Why should the charge(s) be transferred to the proposed receiving project (how does the project benefit)?
3. Why are the charges allowable and allocable based on the terms and conditions of the receiving award?

Generic or incomplete justifications may be returned to the preparer for additional explanation.
Late Salary Cost Transfers (Beyond 90 Days)

An Example of a Late Salary Cost Transfer: A payroll error was posted on 9/30 but was not identified until after 12/31. A late salary cost transfer request should be submitted immediately. However, should it not meet the extenuating circumstances, charges would be required to be moved to a non-sponsored departmental account.

The distribution of salary charges for University personnel should be a reasonable reflection of the employee’s effort. These distributions should be reviewed on a regular basis. If changes are anticipated, a payroll change request should be prepared.

In the cases where these changes were not anticipated, resulting in the need to submit a salary cost transfer request, the request should be submitted immediately (see “Timeliness,” below).

Careful consideration must be given to personnel allocations to ensure that projects that benefit are charged properly at the outset and that further adjustments are not required. Salary distribution and effort as certified in ECRT must coincide. Note: for transfers affecting sponsored project IDs, if the salary cost transfer request affects a closed Effort certification period, refer to the Effort Reporting Guidelines for further guidance.

Permissibility of Salary Cost Transfers

For a Salary Cost transfer to be permissible, it needs to meet the criteria established for both timeliness and appropriateness.

Timeliness

Salary Cost transfers should be processed immediately after the error is identified, but in any case not later than 90 days after the end of the month of the original transaction. Transfers made after this period of time raise questions concerning the propriety of the transfer. Requests for transfers made after 90 days will be considered only under extenuating circumstances.

Note: The University of Wisconsin – Madison is obligated to immediately correct unallowable charges made to sponsored projects, regardless of time frame.

Each Late Salary Cost transfer must be clearly explained with supporting documentation. The PI or designee has primary responsibility for fulfilling these requirements and maintaining the related records. In addition, the PI or designee is responsible for providing appropriate documentation. Research and Sponsored Programs may also require additional supporting documentation or information beyond what is required with the salary cost transfer request.

Process

To process Late Salary Cost transfers, you will need to submit a completed Salary Cost Transfer in the Cost Transfer Tool to your School/College Dean’s Office. The Dean’s Office will route it to Research and Sponsored Programs for approval. The Cost Transfer Tool requires additional justification for salary cost transfers made after 90 days. You must provide this complete justification by addressing the following questions:

1. Why was this expense originally charged to the coding from which it is now being transferred?
2. Why should the charge(s) be transferred to the proposed receiving project (i.e. how does project benefit)?
3. Why are the charges allowable and allocable based on the terms and conditions of the receiving award?
4. Why is this cost being transferred more than 90 days after the transaction occurred?
5. What corrective action has taken place to eliminate the need for cost transfers of this type in the future?

Generic or incomplete justifications may be returned to the preparer for additional explanation.
Non-Salary Cost Transfers within 90 Days

An Example of a Non-Salary Cost Transfer: An error was posted on 9/15. A non-salary cost transfer request needs to be submitted prior to 12/31.

Permissibility of Non-Salary Cost Transfers

For a Non-Salary Cost transfer to be permissible, it needs to meet the criteria established for both timeliness and appropriateness.

Timeliness

Non-Salary Cost transfers should be processed immediately after the error is identified, but in any case no later than 90 days after the end of the month of the original transaction. Transfers made after this period of time raise questions concerning the propriety of the transfer.

Each Non-Salary cost transfer must be clearly explained with supporting documentation. The PI or designee has primary responsibility for fulfilling these requirements and maintaining the related records. In addition, the PI or designee is responsible for providing appropriate documentation. Research and Sponsored Programs may also require additional supporting documentation or information beyond what is required with the non-salary cost transfer request.

Process

To process Non-Salary Cost transfers within 90 days, you will need to submit a completed Non-Salary Cost Transfer in the Cost Transfer Tool to your School/College Dean’s Office. The Dean’s Office will route it to Research and Sponsored Programs. As general guidance, the explanation should address the following questions:

1. Why was this expense originally charged to the project from which it is now being transferred?
2. Why should the charge(s) be transferred to the proposed receiving project (how does the project benefit)?
3. Why are the charges allowable and allocable based on the terms and conditions of the receiving award?

Generic or incomplete justifications may be returned to the preparer for additional explanation.
Late Non-Salary Cost Transfers (Beyond 90 Days)

An Example of a Late Non-Salary Cost Transfer: An error was posted on 9/15, but was not identified until 1/15. A late non-salary cost transfer request should be submitted immediately. However, should this not meet the extenuating circumstances, charges would be required to be moved to a non-sponsored departmental account.

Permissibility of Non-Salary Cost Transfers

For a Non-Salary Cost transfer to be permissible, it needs to meet the criteria established for both timeliness and appropriateness.

Timeliness

Non-Salary Cost transfers should be processed immediately after the error is identified, but in any case no later than 90 days after the end of the month of the original transaction. Transfers made after this period of time raise questions concerning the propriety of the transfer. Requests for transfers made after 90 days will be considered only under extenuating circumstances.

Note: The University of Wisconsin – Madison is obligated to immediately correct unallowable charges made to sponsored projects, regardless of time frame.

Each Late Non-Salary cost transfer must be clearly explained with supporting documentation. The PI or designee has primary responsibility for fulfilling these requirements and maintaining the related records. In addition, the PI or designee is responsible for providing appropriate documentation. Research and Sponsored Programs may also require additional supporting documentation or information beyond what is required with the late non-salary cost transfer request.

Process

To process Late Non-Salary Cost transfers, you will need to submit a completed Non-Salary Cost Transfer in the Cost Transfer Tool to your School/College Dean’s Office. The Dean’s Office will route it to Research and Sponsored Programs. The Cost Transfer Tool requires additional justification for non-salary cost transfers made after 90 days. You must provide this complete justification by addressing the following questions:

1. Why was this expense originally charged to the coding from which it is now being transferred?
2. Why should the charge(s) be transferred to the proposed receiving project (i.e. how does project benefit)?
3. Why are the charges allowable and allocable based on the terms and conditions of the receiving award?
4. Why is this cost being transferred more than 90 days after the transaction occurred?
5. What corrective action has taken place to eliminate the need for cost transfers of this type in the future?

Generic or incomplete justifications may be returned to the preparer for additional explanation.
Roles and Responsibilities

Principal Investigator/Department Designee Responsibilities:

- Ensures that expenditures are allocable, allowable, and reasonable to a specific sponsored project.
- Ensures that expenditures are allocated in accordance with award budget, sponsor guidelines, and UW-Madison policy.
- Ensures that individuals have appropriate authority to incur and allocate expenditures.
- Ensures that monthly monitoring of expenditures, timely correction of errors, and reallocation of expenses, including personnel effort, occurs.
- Ensures compliance with UW-Madison Cost Transfer Policy.
- Initiates and/or authorizes requests for cost transfers.
- Provides complete, clear and reasonable justification for transfers as required by this policy.
- Manages project to minimize the need for cost transfers.

College / School Responsibilities:

- Ensures that personnel responsible for financial administration of sponsored projects are familiar with UW-Madison Cost Transfer Policy.
- Provides oversight and advice on sponsored project administration including cost transfers and effort reports.
- Provides support to answer questions and concerns from PI’s and departments regarding cost transfer issues.
- Approves transfers, and ensures 90-day compliance with UW-Madison Cost Transfer Policy.

Research and Sponsored Programs Responsibilities:

- Exercises stewardship over sponsored projects in accordance with specific award terms and conditions and sponsor policy.
- Advises PI, Department, and Dean’s Office on processing cost transfer adjustments and procedures.
- Reviews and approves cost transfers and supporting documentation in accordance with UW-Madison policy and sponsor guidelines.
- Provides training on Cost Transfer Policy and principles of sponsored project administration.

Please note that the distribution of these responsibilities may vary in different areas of campus. Responsibilities may be shared or delegated differently between the respective groups depending on organizational structure and staffing at the PI/designee, college/school, and Research and Sponsored Programs Office level.

Assistance and Support

Research and Sponsored Programs is available to respond to inquiries and assist the PI or designee and College/School personnel with question regarding Cost Transfers. Your College/School’s Dean’s administrative office will also be able to provide guidance with cost transfer issues and concerns.
Project Management

It is critical that all sponsored project expenditures be reviewed on a regular basis to ensure that both salary and non-salary charges are correct and appropriate. It is the responsibility of the principal investigator, and/or the PI’s designee, to authorize transactions and review the expenditure activity. This review should include the determination that the charges are reasonable, allowable, allocable, and directly support the scope of work for that project.

Appropriateness

Typically, cost transfers are appropriate when they involve allowable direct costs of the sponsored project and the purpose is to:

- Correct errors in processing the original charge
- Move costs between projects for closely related work (as defined by the project scope) that is supported by more than one funding source
- Transfer pre-award costs in accordance with the provisions of 2 CFR 200, Subpart D §200.308(d)(1) or OMB Circular A-110, Section C.25.e.1

Lack of Appropriateness

Inappropriate circumstances for cost transfers include, but are not limited to, the following:

- When the transfer is largely for the purpose of utilizing unexpended funds on a sponsored project
- When the transfer is for the purpose of avoiding or clearing a cost overrun by charging another, unrelated sponsored project
- When the transfer circumvents award terms and conditions or the cost principles

Frequent, late, and inadequately explained or documented transfers raise serious questions about the appropriateness of the cost transfers and may result in audit disallowances.
Additional Regulatory References

OVERVIEW:

Sponsored programs are subject to many terms and conditions from a variety of sources. Accordingly, the University of Wisconsin System Administrative Policy 342 (formerly G2): Extramural Support Administration, section 7 stipulates that all extramural funds are subject to the following rules and regulations:

- All applicable Federal Office of Management and Budget (OMB) Circulars.
- Rules and regulations of the granting agency.
- Guidelines established by the National Association of College and University Business Officers (NACUBO).
- State and UW System policies and procedures.
- State Statutes.
- Regent Policies.

FEDERAL GUIDELINES:

Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR 200) and Office of Management and Budget (OMB) Circulars

2 CFR 200 and OMB Circulars provide the overall guidance for use of Federal funds. It is expected that all recipients of Federal funds will comply with the terms and conditions of the appropriate subpart of 2 CFR 200 or Circulars in all circumstances. 2 CFR 200 applies to awards issued on or after December 26, 2014. OMB Circulars may apply to awards issued prior to December 26, 2014.

- 2 CFR 200, Subpart E—Cost Principles, §§200.402-200.405 or OMB Circular A-21 “Cost Principles for Educational Institutions” (05/2004) sections C.1-C.4 establish basic cost considerations which include the concepts of allowability, allocability, and reasonableness.

- 2 CFR 200, Subpart E §200.405(c), which is of particular importance, states: “Any cost allocable to a particular Federal award under the principles provided for in this part may not be charged to other Federal awards to overcome fund deficiencies, to avoid restrictions imposed by Federal statutes, regulations, or terms and conditions of the Federal awards, or for other reasons.” Similar guidance was provided in A-21, C.4.b.

- 2 CFR 200, Subpart D—Post-Award Federal Requirements, §200.343(b) states: “Unless the Federal awarding agency or pass-through entity authorizes an extension, a non-Federal entity must liquidate all obligations incurred under the Federal award not later than 90 calendar days after the end date of the period of performance as specified in the terms and conditions of the Federal award.” Similar guidance was provided in OMB Circular A-110 “Uniform Administrative Requirements for Grants and Other Agreements with Institutions of Higher Education, Hospitals and Other Non-Profit Organizations” (09/1999) subpart D.71 (b).

- 2 CFR 200, Subpart F—Audit Requirements, §200.514 stipulates that each fiscal year an annual audit be conducted to determine whether the auditee has complied with Federal statutes, regulations, and the terms and conditions of Federal awards.” An annual Compliance Supplement is issued with a matrix of compliance requirements for grants from each federal agency providing auditors specific instructions for reviewing auditee’s internal control systems as well as adherence to allowable cost guidelines and principles. Similar guidance was provided in OMB Circular A-133 “Audits of States, Local Governments, and Non-Profit Organizations” section E.500.

Policies of Federal Granting Agencies:

- The NIH Grants Policy Statement (NIHGPS) (Rev. 11/16) Part 7.5, suggests:

  "Cost transfers to NIH grants by recipients...should be accomplished within 90 days.... The transfers must be supported by documentation that fully explains how the error occurred and a certification of the correctness of the new charge by a
responsible organizational official of the recipient...merely stating that the transfer was made "to correct error" or "to transfer to correct project" is not sufficient. Transfers of costs from one project to another or from one competitive segment to the next solely to cover cost overruns are not allowable. Recipients must maintain documentation of cost transfers, pursuant to 45 CFR 75.364, and must make it available for audit or other review.... Frequent errors in recording costs may indicate the need for accounting system improvements, enhanced internal controls, or both. If such errors occur, recipients are encouraged to evaluate the need for improvements and to make whatever improvements are deemed necessary to prevent recurrence. NIH also may require a recipient to take corrective action by imposing additional terms and conditions on an award(s)."

As Non-NIH agency guidelines may differ, please check individual agency policy for the allowability of Cost Transfers.
Extenuating Circumstances

Approval for late cost transfers will be granted only in extenuating circumstances.

Examples of Allowable Extenuating Circumstances:

- Late issuance of an award or full execution of an agreement or subaward agreement after the start of the budget year or other period of performance. Supporting documentation is required. Research and Sponsored Programs recommends that an Advance Award request via WISPER be established, which is done at the request of the Principal Investigator or designee.
- Failure of a timely response in another unit when supporting documentation has been properly submitted, e.g., a properly submitted payroll distribution change request. Supporting documentation will be required.
- Transfer of expenditures to a sponsored project where the appropriate account could not be activated on a timely basis before the begin date of the project.

Examples of Unallowable Circumstances for Late Cost Transfers:

- Absences of the PI or designee, or shortage or lack of experience of staff. It is the responsibility of the College/School and the PI to ensure the availability of qualified staff to administer and exercise stewardship over sponsored projects in accordance with the sponsor’s policies and regulations, including those relating to regular monitoring of expenditures and timely correction of errors and reallocation of expenses.
- At no time should sponsored projects be used for expenses that will subsequently be transferred elsewhere.

More Information

- Late Salary cost transfers
- Late Non-Salary cost transfers
Cost Transfers Frequently Asked Questions

Q1: Why is the time period 90 days?

Ninety (90) days has emerged as the standard used by government and business auditors to determine whether costs are reasonably assigned to their proper project and function. It is a standard established in federal circulars and grant policy.

Standard practice should be to post costs to the most appropriate project/grant. However, subsequent adjustments may be necessary, for example to account for unforeseen shifts of personnel between closely related sponsored projects, or to correct errors. These actions are reasonable if transferred within 90 days.

Q2: How do you calculate the 90-day period?

The 90 days begins at the end of the month in which the expense is posted.

For example, if a travel expense is posted September 15, the 90-day period begins September 30. Transfers initiated by December 31 would fall within the 90-day period. Transfers initiated after that date would be considered late cost transfers and require the additional justification. The transfer justification questions will automatically display in the Documentation tab. A transfer cannot be processed until all required responses are provided.

Q3: Is this standard applicable to all sources of University funds?

No, the 90-day standard is being applied only to sources of extramurally sponsored projects that are in fund 144 and sponsored projects in fund 133. Although this standard is not a requirement for other funds or gift accounts in fund 233, it should be considered useful guidance. It is important for the University as a whole to record its costs (and associated revenues) in a timely fashion. The accuracy and auditability of its records are improved when postings and corrections are made in a timely manner.

Q4: Is this standard applicable to all my Sponsored Projects?

No, this standard is only applicable to all extramurally sponsored University projects and activities in fund 144 (Federal) and fund 133 (Non-Federal). If you have projects managed in other fund sources (101, 135, 136, etc), the 90 day-standard is not a requirement. It should be considered useful guidance.

Q5: Is this standard applicable to salaries?

Yes, this standard is applicable to salary expenditures. It is especially important that, to the extent possible, payroll expenditures are budgeted and recorded on the proper Project ID at the time of their occurrence.

Q6: Can I wait until our department completes its effort reports before submitting salary transfers?

Generally not. The intended use of effort reports is not as a check of where salary charges are made. Salary distributions should be reviewed on a regular basis so the effort reports are a reasonable reflection of the employee’s paid effort when first generated. There may be situations where changes are needed to the effort reported and the corresponding salary transfer is needed. The transfer may be appropriate, but because it is beyond 90 days the transfer would also need to meet the extenuating circumstances.

Q7: How should research expenditures for project work be recorded before a sponsored project is established?

The College/School Dean’s Office can assist in establishing an Advance Award (requested in WISPER). It is not appropriate to use a generic discretionary account and move expenses to the funded award beyond 90 days.

Q8: What if a vendor doesn’t provide an invoice for services rendered within 90 days?

Although rare, this circumstance can occur and may be an acceptable circumstance for a late transfer justification. The University cannot pay for services for which it has not been invoiced. Vendors should be contacted immediately and urged to submit an invoice for the services.
outstanding invoices or risk the possibility of non-collection due to lapsing funds. If a vendor invoices later than 90 days after the provision of services, the University will pay upon receipt and note for the record that the invoice was late.

Q9. What if a program is disputing an invoice with a vendor and the dispute extends beyond 90 days?

The dispute should be clearly documented between the program and the vendor. The University has an obligation to notify vendors in a timely manner if goods and services are not satisfactory and to timely pursue resolution of outstanding issues. Delays due to the normal course of other business intervening, change in personnel or other departmentally based factors are not acceptable reasons for delaying posting of expenditures.

Q10: Is it allowable to place charges on a single MDS account, or other internal vendor account, but then transfer/reallocate these costs to several other 144 projects?

Generally, Federal projects (Fund 144) should not be used as the default project ID for P-cards, MDS, or other service center costs. Discretionary funds should be used for default funding and then the charges moved to Federal projects using appropriate methods.

However, whenever possible costs should be charged to the appropriate sponsored project when first incurred.

Q11: If I miss my biweekly pro-card project rollup, and I then have to process cost transfers, will they be approved?

Research and Sponsored Programs strongly recommends that all P-card purchases be allocated appropriately to the correct project ID during the biweekly P-card edit period. Cost transfers within 90 days of the transaction date would be allowable for missed biweekly P-card account rollups with proper justification.

Q12: If a PI requests a salary transfer for a student and then two months later requests another transfer of the same charge to another project, what do I do?

It is the University of Wisconsin-Madison policy that costs be charged to the appropriate sponsored project when first incurred. Unless there are extenuating circumstances clearly explained in the cost transfer justification, a second transfer on a 144 transaction is unallowable. At no time should sponsored projects be used as back-up projects or as discretionary projects for expenses that will subsequently be transferred elsewhere.

Q13: Are generic statements such as “transfer to appropriate funding source” and “to reflect additional efforts” sufficient justification for transfers less than 90 days?

Generic statements are not generally acceptable on extramural support cost transfers. For all charges on a project, you should be able to explain the allowability of those costs. As general guidance, acceptable justifications should be able to address the following:

1. An explanation as to why the expense was originally charged to coding from which it is now being transferred.
2. An explanation as to why the charge needs to be transferred to the proposed receiving project.
3. An explanation as to why the charge is allowable and allocable based on the terms and the conditions of the receiving award.

For cost transfers after 90 days of the accounting date, the justification must include the items above as well as two additional items:

4. Why the cost is being transferred more than 90 days after the accounting date.
5. What corrective action has been taken to eliminate the need for cost transfers of this type in the future at the departmental level.

Q14: May I use a cost transfer to “spend down” a project that is nearing its end date?

If the cost transfer does not meet the standards for allowability, allocability and reasonableness, it will not be approved.

Q15: There is a staffing shortage in our department and I am doing payroll, department administration, grant accounting, etc. Many times my transfers are past 90 days. Will they be approved?
Staff shortages or lack of staff experience are unallowable circumstances for late cost transfers. Auditors typically view this explanation as a sign that the department does not provide adequate monitoring or maintain sufficient internal control over the use of extramural funds. The College/School and the PI have a responsibility to ensure the availability of qualified staff to administer and exercise stewardship over sponsored projects in accordance with the sponsor’s policies and regulations, including those relating to regular monitoring of expenditures and timely correction of errors and reallocation of expenses.

**Q16:** A contract has been in negotiation for 5 months and the project has now been set-up. Work started and costs were charged to our department funding. Can I now transfer 5 months of salary expense to the new project?

A five-month contract negotiation would be considered an allowable extenuating circumstance. The five-month salary transfer should be submitted as soon as the PI knows the new project ID. Supporting documentation/justification is required with the transfer. To avoid this extenuating circumstance, Research and Sponsored Programs recommends that an Advance Award be established, which is done at the request of the Principal Investigator or designee.

**Q17:** I need to do a transfer because of an error created in another department or unit of campus. When I write my justification, should my explanation specify the other unit by name?

Yes. While no one likes to point fingers or blame others for mistakes, it is important to explain the reason for the transfer. Areas that consistently make errors need additional attention and training to help them understand the complications they create. Over the long-term, campus will be working with these units to improve their operations so fewer errors, and corresponding transfers, occur.
